FLOW
ADDITIVES

FLOW ADDITIVES

Our Flow Agents create a smooth finish on film surfaces. Gloss and image clarity are enhanced, especially for high gloss systems. For roller coating, flow agents can also help to promote a uniform film appearance.

JebChem Flow Agents consist primarily of polyacrylate copolymer solutions with different molecular weights. Our flow agents offer good anti-crater properties and have good air release for anti-foam properties.

PRODUCT RANGE – FLOW ADDITIVES

Product Name	Features
JebChem 6116	Good compatibility, wetting and levelling properties. For air dry and baking paints to overcome solvent popping and craters.
JebChem 6354	Good flow and levelling with anti-foam property. Suitable for clear coats.
JebChem 6356	Good Flow and levelling with anti-crater property. Suitable for coil and industrial coatings.
JebChem 6358	Good Compatibility, substrate wetting and levelling. Suitable for car refinish and UV systems.
JebChem 6361	Good flow, levelling with anti-crater property . Suitable for Clear Coats and UV Systems.
JebChem 6377	Excellent substrate wetting, flow and levelling with good anti-crater property. Suitable for coil coating and industrial paints.
JebChem 6380 AQ	Excellent substrate wetting, flow and levelling agent for water-based systems and UV systems. Suitable for overprint varnishes.
JebChem 6381 AQ	Excellent substrate wetting, flow and levelling agent for water-based systems and UV systems. Suitable for overprint varnishes.

FUNCTIONAL OVERVIEW – FLOW ADDITIVES

		System			Paint								Ink				Binder System										Functions			
		Solvent Base	Water Base	UV Curing	Architecture	Automotive	Coil/Baking	Heavy Duty	Pigment Paste	Plastics/Industrial	UV Curing	Wood	Flexo	Gravure	Offset	Screen	2 Pack PU	Acrylic	Acrylic/Melamine	Alkyd	Epoxy	Polyester	PUD	PVAc/AE	Styrene Acrylic	Waterborne Resin	Anti-Crater	Flow & Levelling	Slip & Anti-Blocking	Substrate Wetting
