SPECIAL
ADDITIVES

SPECIAL ADDITIVES

Our Specialty Additives improve paint film property of both solvent-borne and waterborne coating and inks, providing smoother film finishes.

These additives are used to avoid defect, and generate special properties such as improved adhesion and rheology, as well as enhancing formulation to paint requirement properties.

PRODUCT RANGE – SPECIAL ADDITIVES

Product Name	Features
JebChem 9410	Special polymeric rheology modifier with great anti-setting and anti-sagging ability. It has strong rheology and is easy to introduce, suitable for all kinds of solvent-based systems. Takes care of compatibility when used in clear systems.
JebChem 9420	Liquid rheology additive for aqueous and water-reducible coating systems for improved anti-sagging and anti-settling properties. The additive is also especially suited for manufacturing aqueous pigment concentrates. It causes thixotropic flow behavior. Post-addition is possible.
JebChem 9725	Good compatibility with resin systems to promote adhesion to metal substrates and improve water and salt spray resistance to paint film.

FUNCTIONAL OVERVIEW – SPECIAL ADDITIVES

		System		Paint							Ink	Substrate Type			Binder System				
		Solvent Base	Water Base	Architecture	Automotive	Coil/Baking	Heavy Duty	Pigment Paste	Plastics/Industrial	Wood	Screen	Aluminum	Plastics	Steel	2 Pack PU	Acrylic	Alkyd	Polyester	Waterborne Resin
Product Name	Dosage
